## For immediate release

### Beam 4K Inc. selects fellow NE Ohio firm Tendon Manufacturing for aluminum.

Beam 4K, Inc. (Chagrin Falls, OH) announces its selection of Tendon Manufacturing Inc. (Bedford, OH) as contract manufacturer for the aluminum components of Beam4K™ products.

“We depend on aluminum for many elements of our system,” explains Beam 4K Inc. CEO Martin Winston, “so we need a resource that can form and tool and prepare the variety of structures we need using the several different manufacturing processes they each involve. We needed a firm with the right machinery, the right crew, the right kind of veterancy and experience and unwavering access to the aluminum supply chain. We found that and more with Tendon.”

“Beam 4K is an interesting company to work with,” remarks Tendon Vice President Mike Gordon, Jr. “They are tirelessly inventive but rooted in a passion to learn and optimize. Their impossibly narrow wraparound bezel has a very challenging profile. We worked together to find ways to combine manufacturing techniques for their frame base that will speed production and reduce costs. Their rear chassis housing is itself a hybrid of techniques. We love finding new things we can do, especially when it means working with a company with a willingness to adapt in ways that give us both a faster path to their goals.

Beam 4K, Inc. develops proprietary hardware and software (46 Patent-Pending claims) to make it easier for online meetings to communicate more, communicate better and end sooner.
